

How to connect your CIB payments account to your online store on zVendo

- First, you need to activate your store if you haven’t already, then choose a pricing plan.

1. From **My plan**, click on **Start Your Free Trial**, then click on the button to activate your store.

2-Then choose a plan, and scroll down till you find the **payment integration** feature, select it.

Add more features to your online store, and app store.

3-You need to contact **CIB** to create your account, you can use **CIB** to accept payments through Credit Card and e-Wallets. You can contact them [Here](#)
4-After you sign your contract with **CIB** you will be provided with some data, you will use it to connect your **CIB** account to your online store on zVendo to start accepting your customers' payments directly.

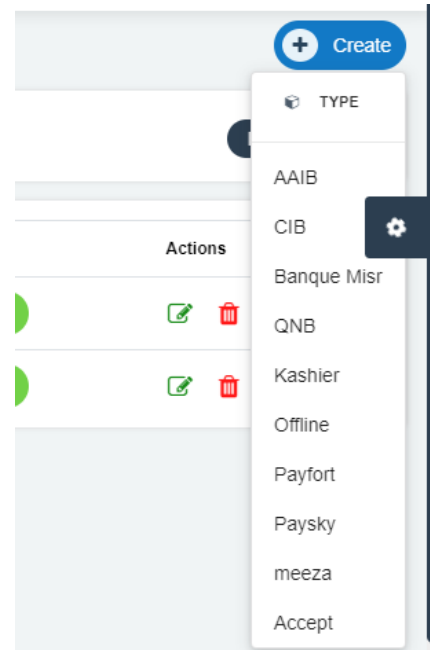

An example of the data you need to connect your account to your store is the following:

Merchant ID	FROM_INST_testtest
Merchant Name	Test test
Currency	EGP
Integration Mode	Hosted Checkout
API User Name	testM_test_06
API Password	94test377testtest4f067test89

-To connect your payment account, Follow these steps:
1-From your online store admin page, go to the navigation bar, click on **store configuration>Payments>Payment methods**, Click on **Create**

2- From the drop-down menu, Choose **CIB**

3-Enter name, check the channels you want to use this payment method on, add all information of your payment gateway, to accept payments to your bank account.
4-Add the data that **CIB** provided you with.
